Would you be able to give a definition to the word “sustainability”

Conserving natural resources

fulfilling the needs of current generations without compromising the needs of future generations, while ensuring a balance between economic growth, environmental care and social well-being

fulfilling own needs without a claim on the future

Sustainable = made / meant to last, in the economic, environmental and societal way

meeting our own needs without compromising the ability of future generations to meet their own needs. In addition to natural resources, we also need social and economic resources.

To lengthen the life of planet earth

A Healthy Planet

use less and with responsibility

recognition of the right of the life

Would you be able to give a definition to the word “sustainability”

Satisfy your needs without damages for others (from different point of view)

Live in a manner with the goal of minimizing our impact on nature and the environment

As consumers become more environmentally conscious, more companies and businesses are finding ways to reduce their impacts upon the planet and their community.

The skill of a person to be conscious about the impact his way of live and his resources consumption has on the planet health and on the quality of life of the rest of the world.

Using materials of good quality, so you can use them for a longer period. Also use materials and products that are environment friendly.

future generations

Being aware to respect the environment and the future of the planet

Spin the wheel for evaluation
